

Greedy sampling (normalized at t=0)

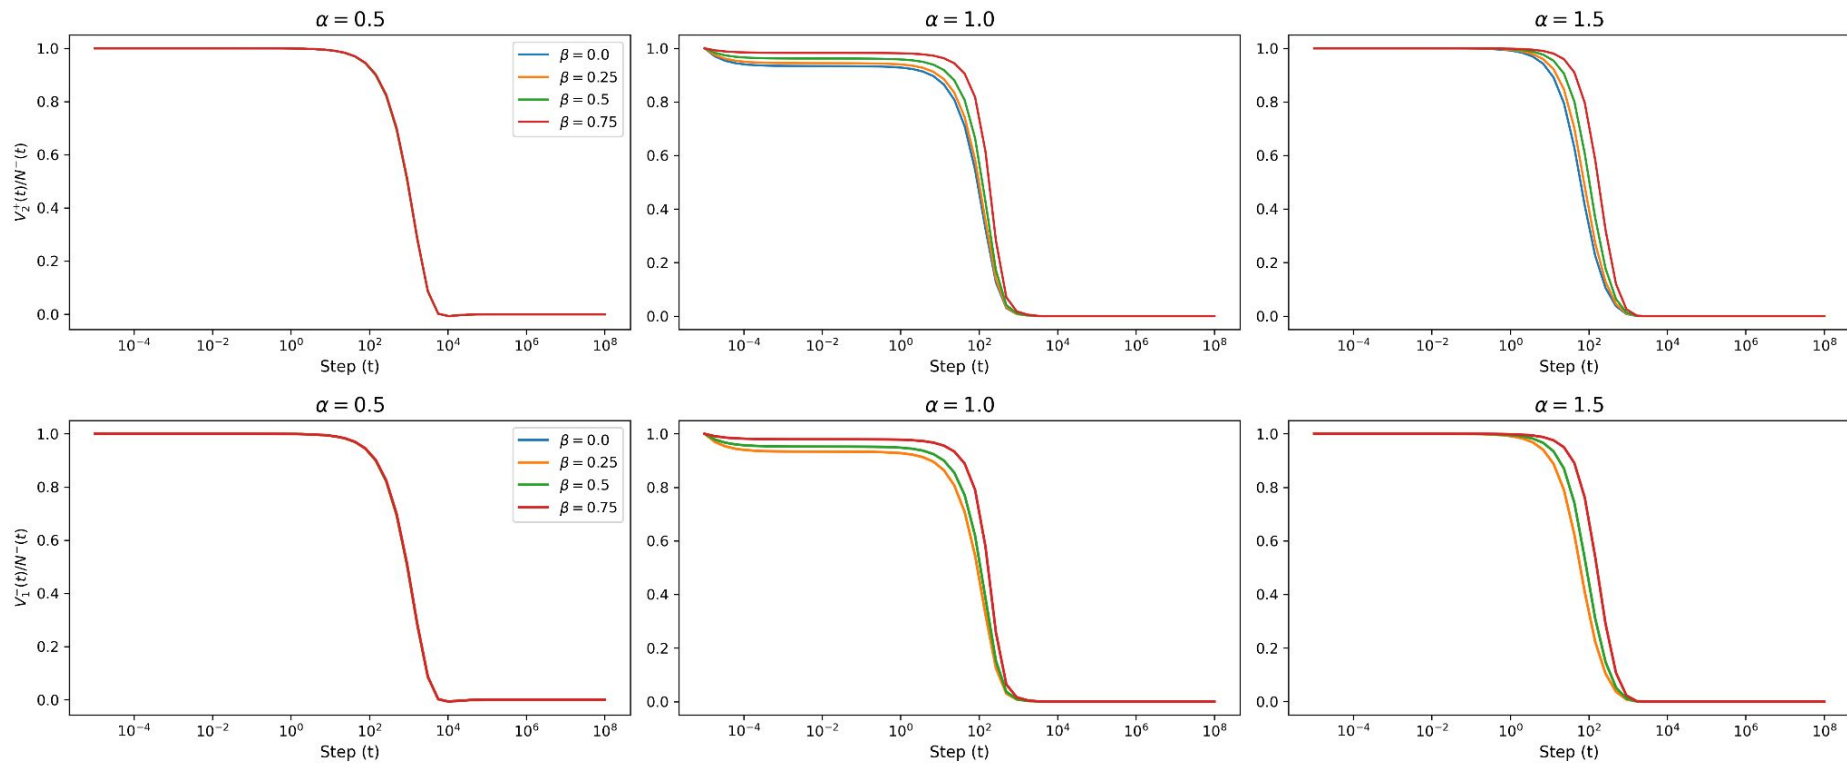

Dynamics of normalized off-diagonal components $V_2^+(t)$ and $V_1^-(t)$ (greedy sampling, $d = 1000$)

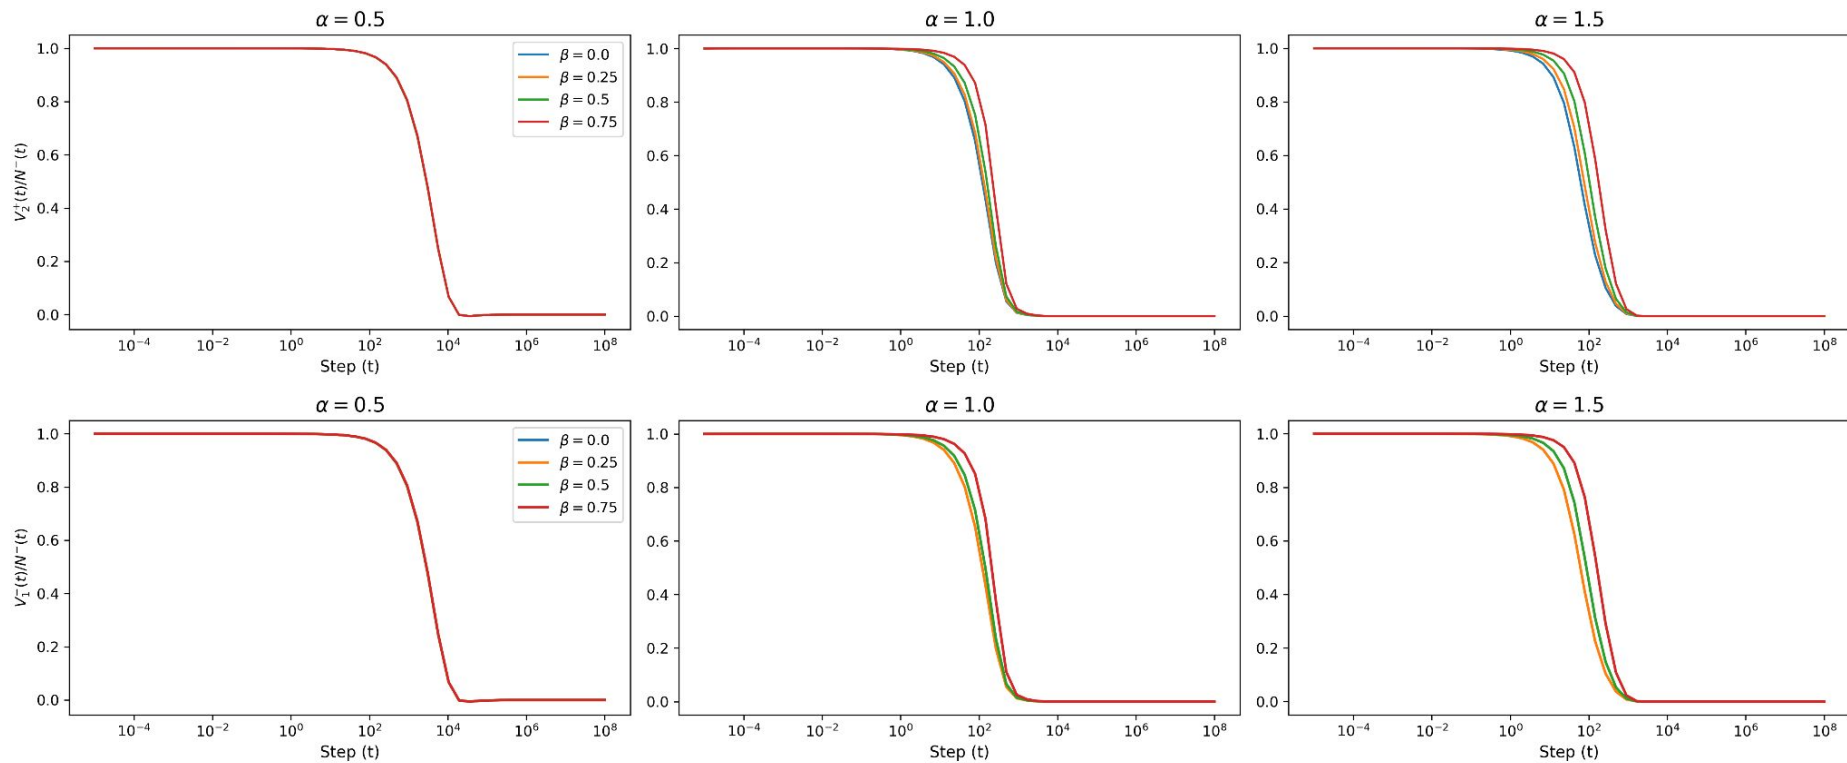

Dynamics of normalized off-diagonal components $V_2^+(t)$ and $V_1^-(t)$ (greedy sampling, $d = 5000$)

Dynamics of normalized off-diagonal components $V_2^+(t)$ and $V_1^-(t)$ (greedy sampling, $d = 10000$)

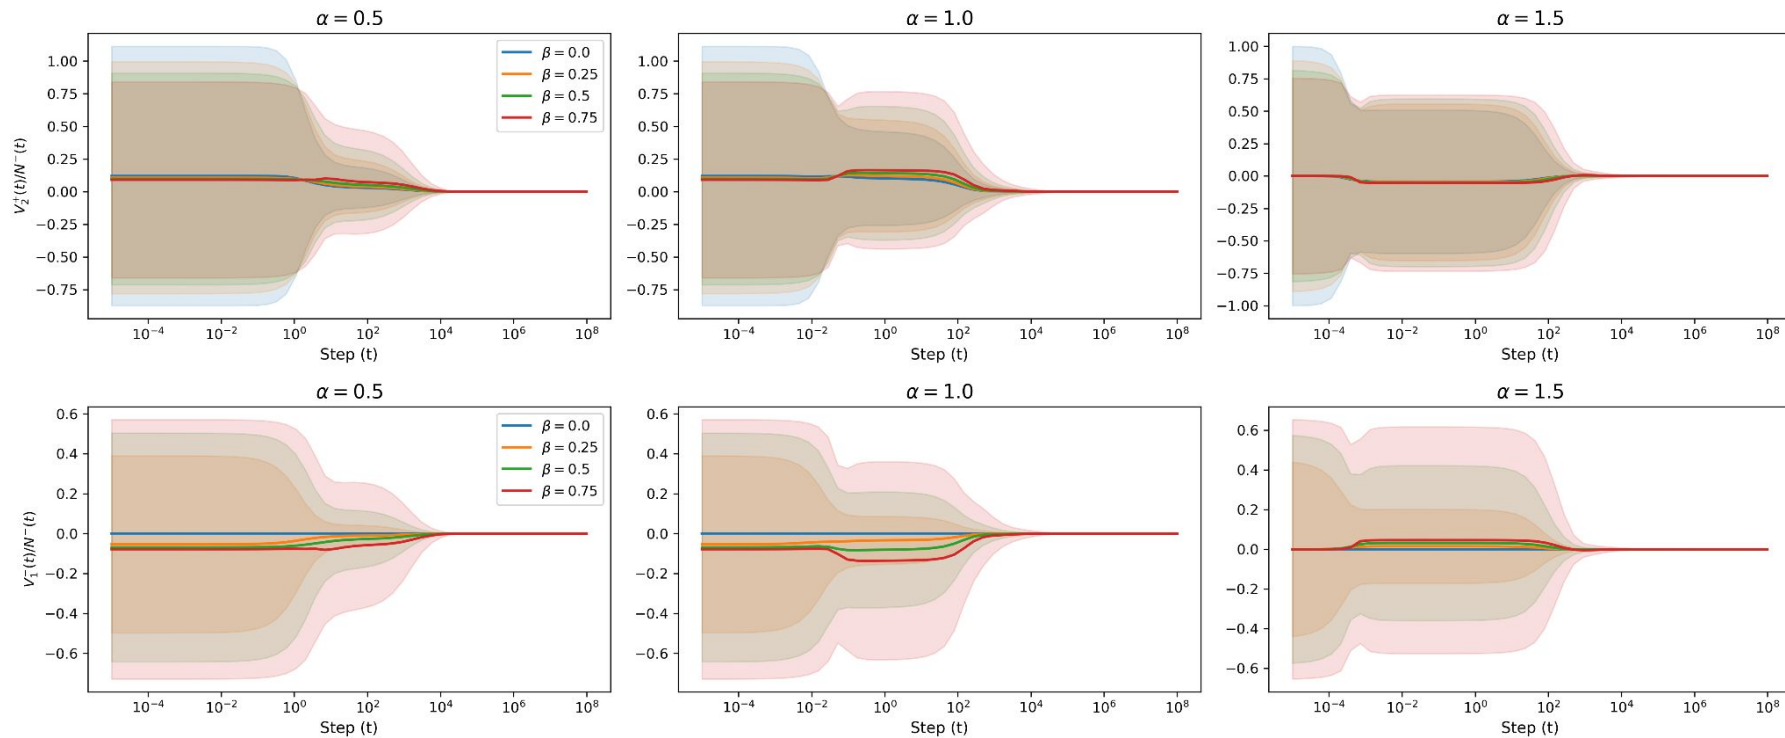

Dynamics of normalized off-diagonal components $V_2^+(t)$ and $V_1^-(t)$ (greedy sampling, $d = 100000$)

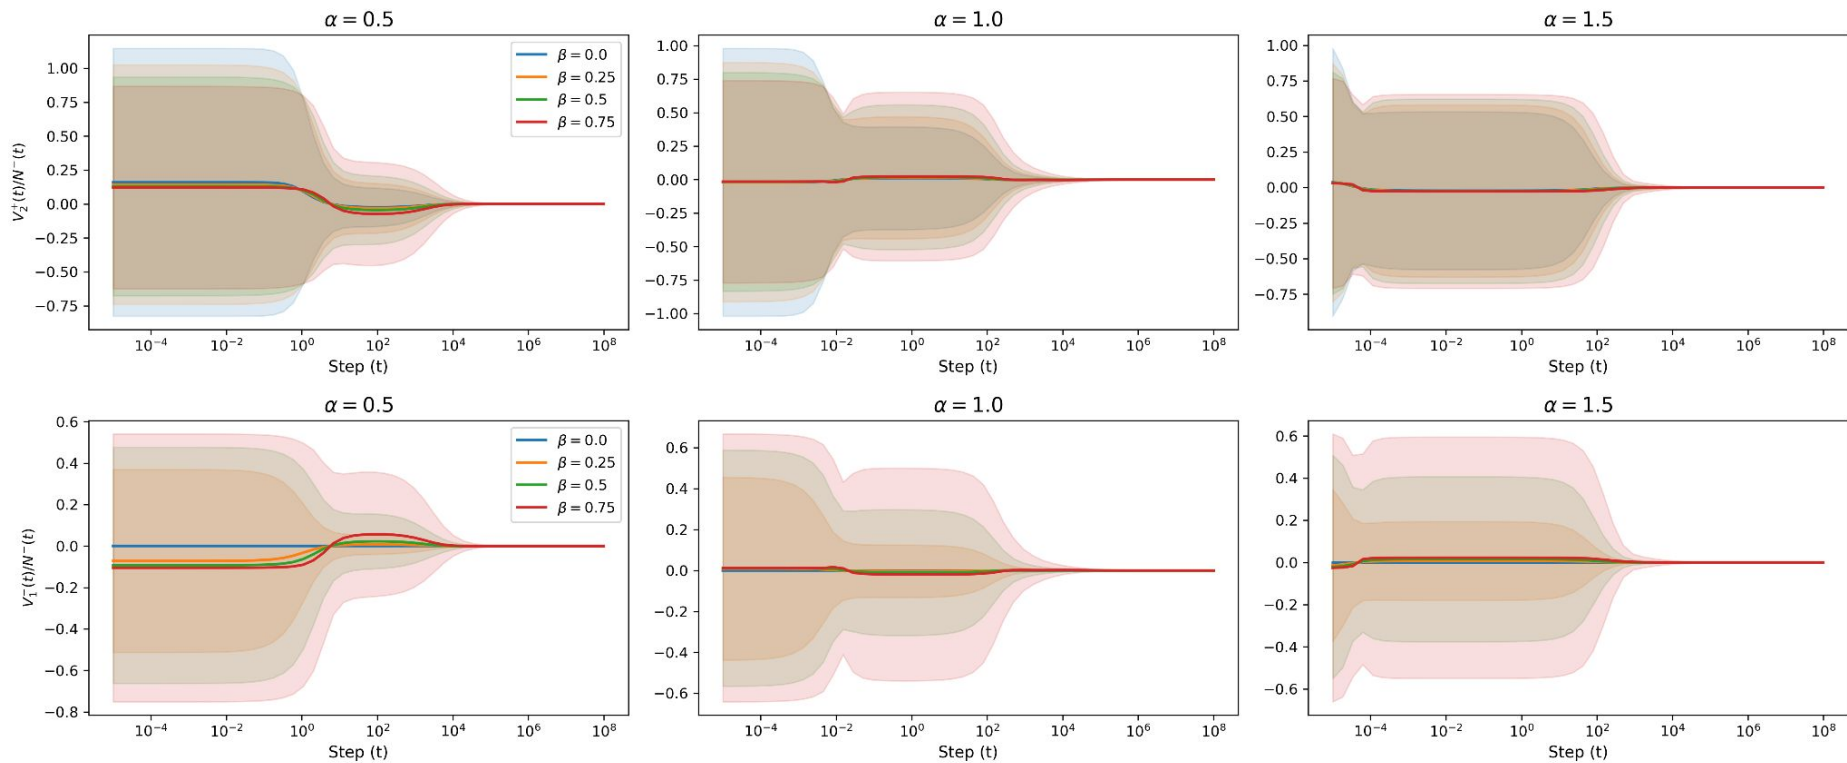

Hybrid sampling over multiple runs

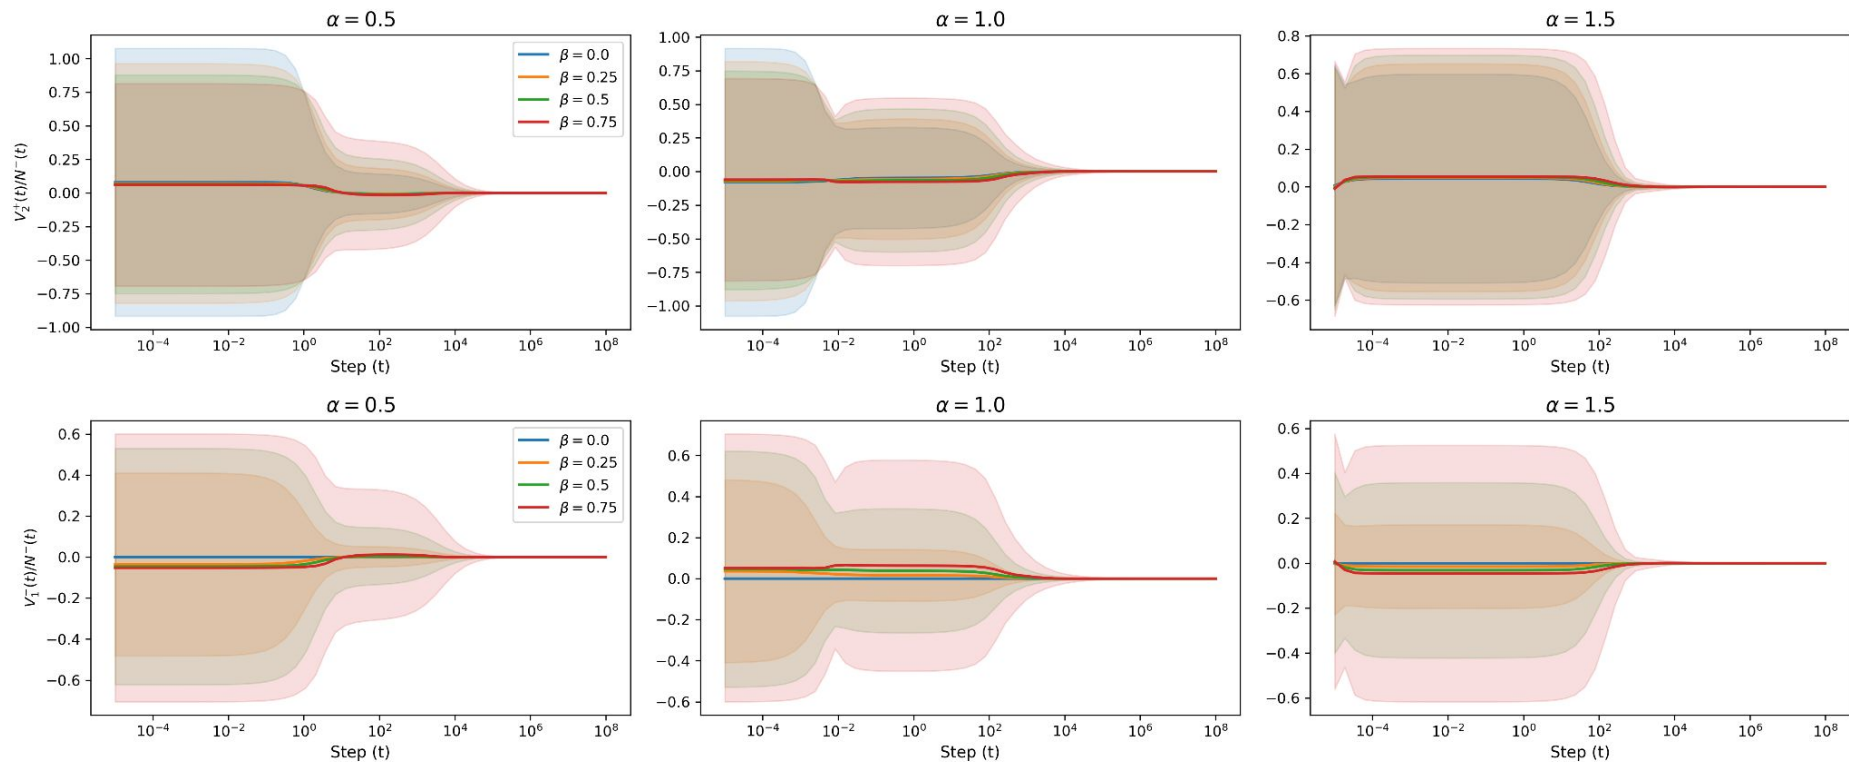

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 1000$)

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 5000$)

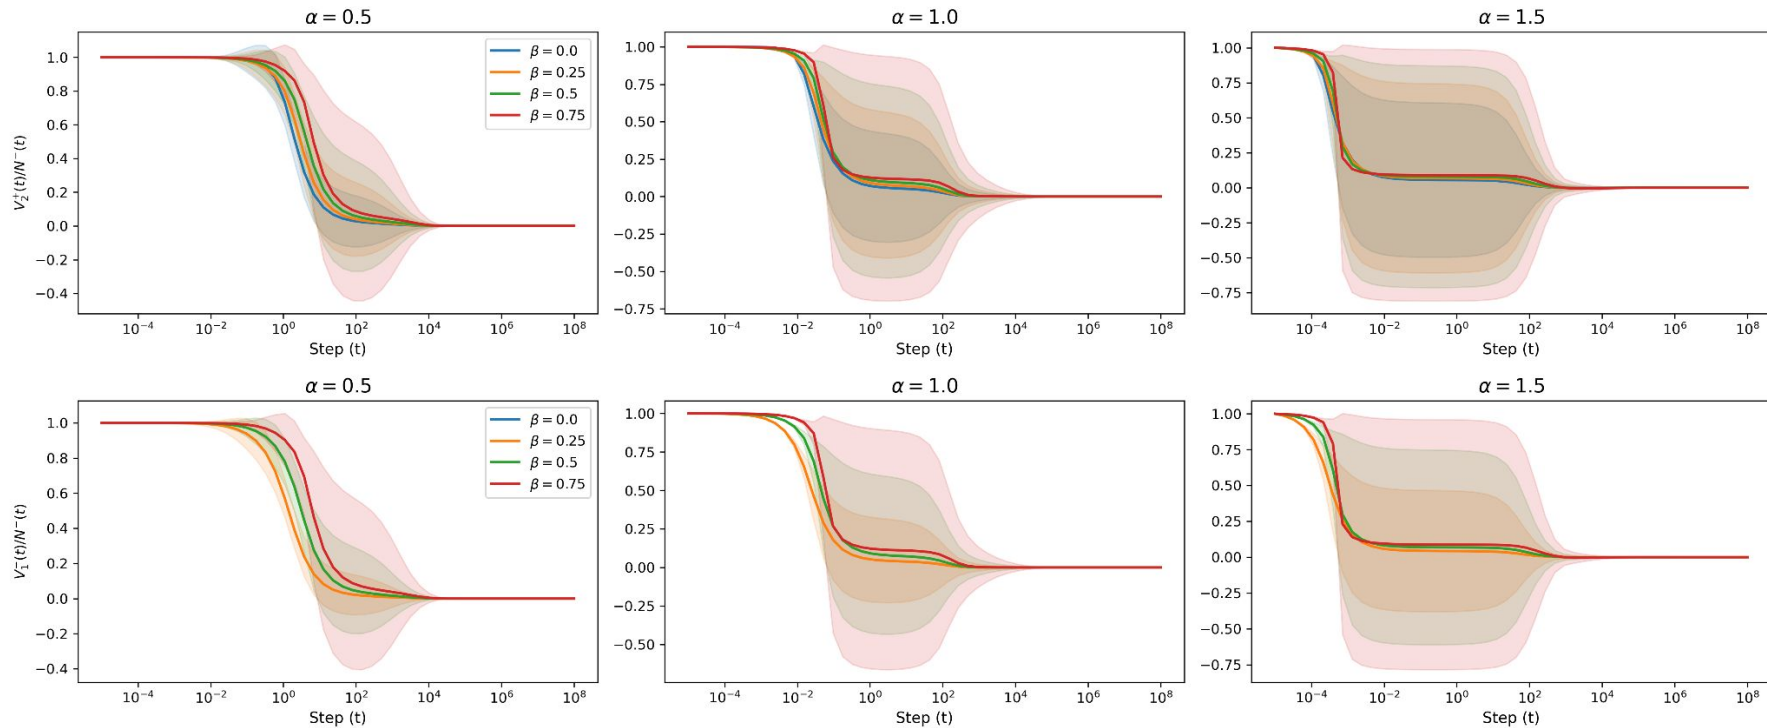

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 10000$)

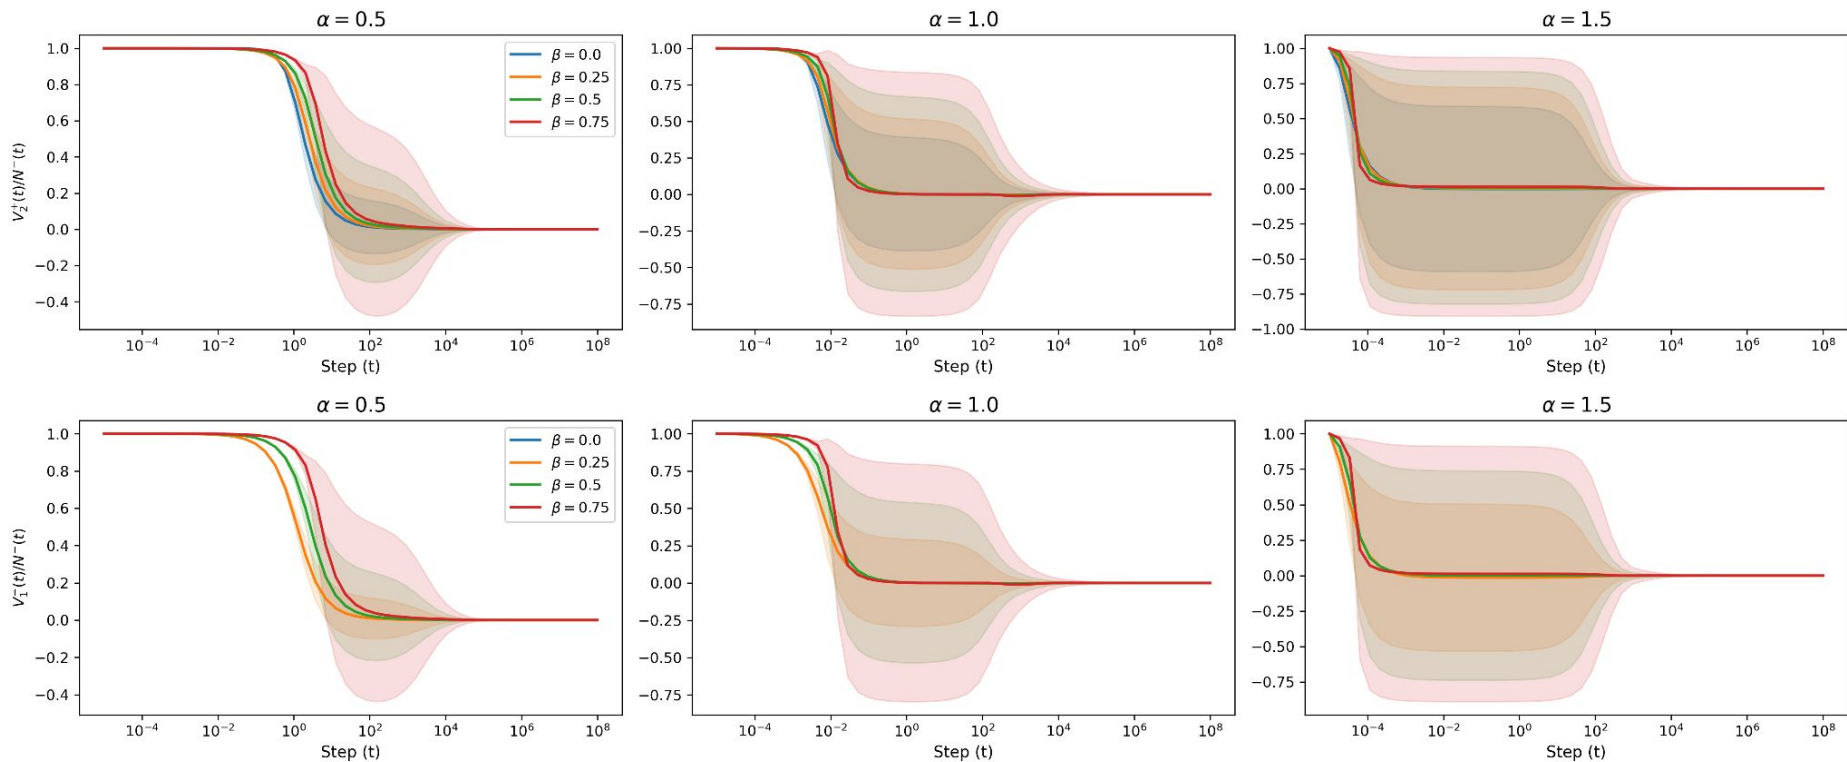

Hybrid sampling (normalized at $t=0$) over multiple runs

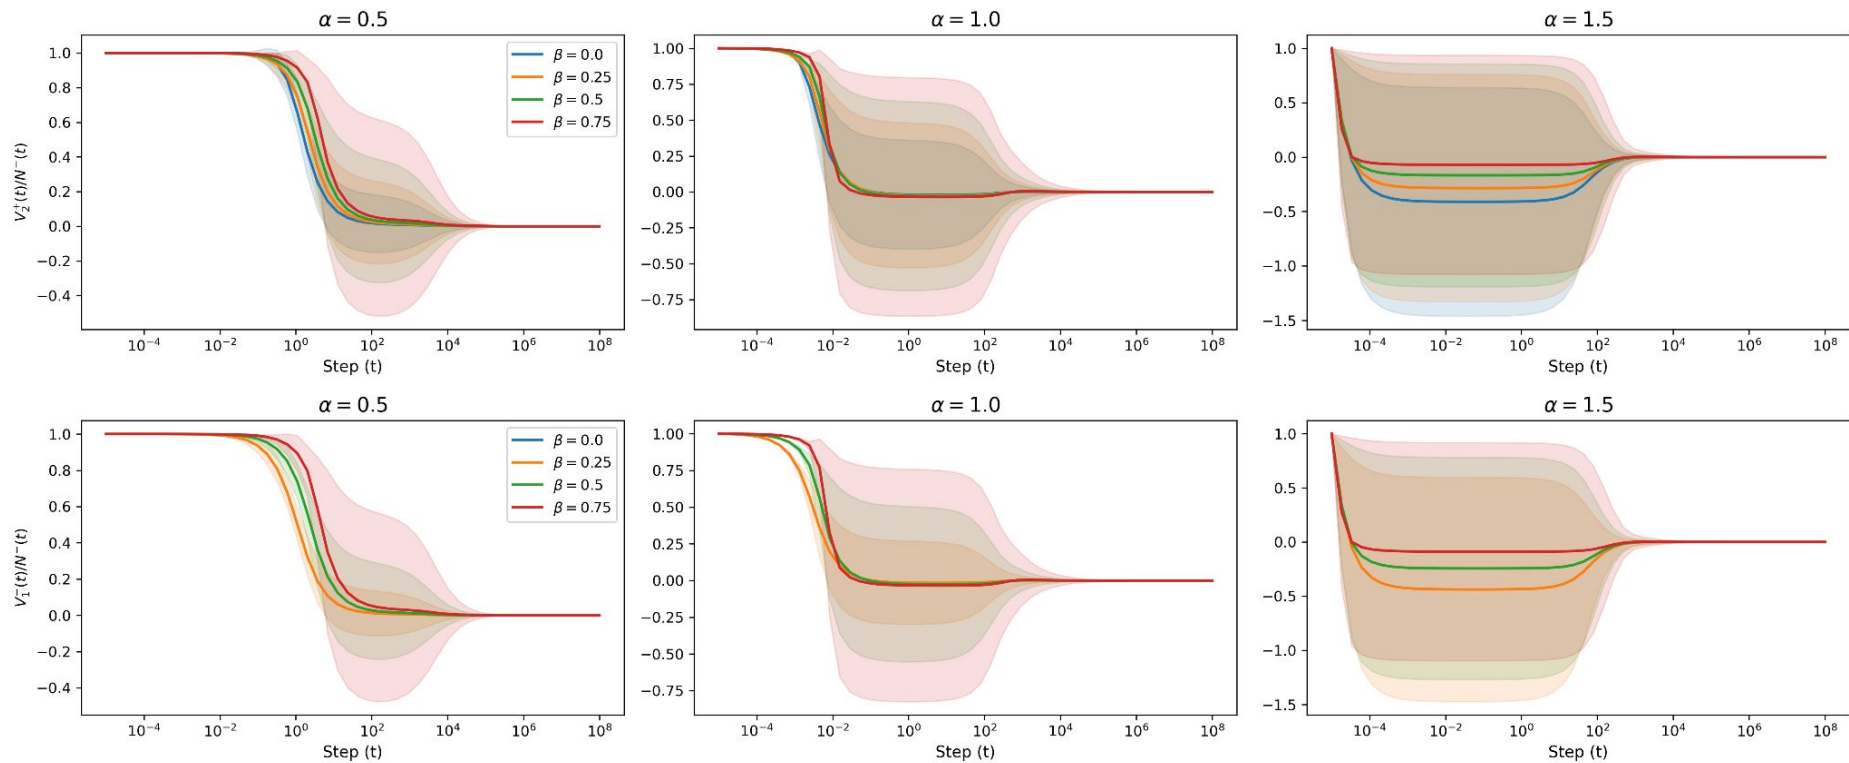

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 1000$)

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 5000$)

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 10000$)

Dynamics of normalized off-diagonal components $V_1^+(t)$ and $V_2^-(t)$ over 100 runs ($d = 100000$)
